

FusePack Wipes

A More Sustainable eCommerce-Ready Solution

Typical wipes containers are bulky, use an excessive amount of plastic and tend to lose moisture over time, causing decreased shelf life. FusePack Wipes represent the next generation of wipes packaging technology.

This innovative new technology platform breaks the boundaries of traditional packaging by pairing a rigid injection molded frame and a flexible in-mold label sidewall. By leveraging the best elements of rigid and flexible packaging, Jabil has created a lightweight yet strong package that reduces carbon footprint and minimizes plastic content while improving e-commerce performance.

Fusepack Wipes offer a significant reduction in weight when compared with competing formats, helping brands achieve the same volume of traditional packaging with a reduced carbon footprint. The ability to stack FusePack in route to filling provides an increase in pallet density, driving down costs and carbon emissions.

MARKET APPLICATIONS

- Surface Cleaning
- Personal Cleansing
- Skin Care
- Baby Care

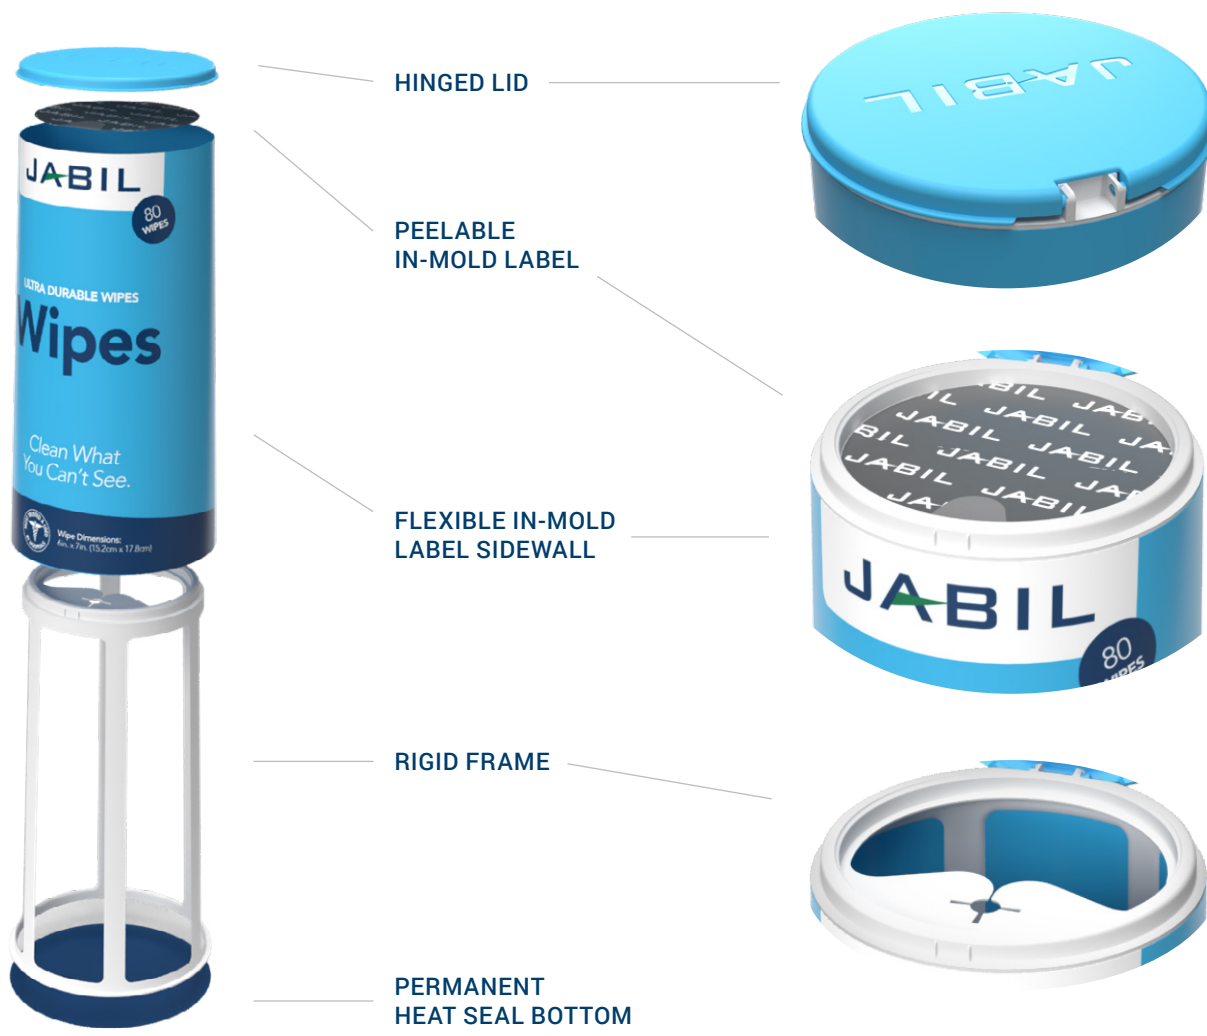

PRODUCT BENEFITS

- Lightweight Strength
- Improved Brand Presentation
- Optimized for eCommerce
- Reduced Plastics Footprint
- Maximum Moisture Retention

PRODUCT FEATURES

- Composite Structure
- High Impact Graphics
- Barrier Properties
- Maximized Volumetric Efficiency
- Mono Material
- Device Refill Functionality

ABOUT JABIL PACKAGING SOLUTIONS

Jabil Packaging Solutions, headquartered in St. Petersburg, Florida, enables food and beverage, home, personal and professional brands to create differentiated products in areas including intelligent, active, rigid and sustainable packaging, as well as consumer devices. Purposeful innovation, advanced conversion capabilities and best-in-class manufacturing practices are just some of the drivers that enable us to co-develop game-changing rigid packaging for our customers.
